Upgraded from Gitlab 7.5.3 to 7.6.2 omnibus in less time than it took to eat a sandwich. Nice.

GitLab looks really good. There is a school of thought that says F/OSS shouldn't be hosted on a proprietary service. I'm sympathetic.

@gitlabhq Just set up GitLab via docker on my new VPS. Damn, so easy! And so fast. Who needs github?

**CT14.IT** @ct14_it · Nov 3

A great side effect of using Gitlab is that I now see just how many small projects I work on. Very nice seeing them all listed in one place.

**Branden Faulls** @omphe · Nov 2

Kicking the tyres on GitLab in between homework today. Very impressed. Docker's made this easy to try:
